

HP1000 Eyelet Machine

For the professional workroom.

Specifically designed for larger eyelets such as curtain eyelets. The machine will with the appropriate dies cut the correct size hole in your fabric and then attach the eyelet.

Can be used to set 25mm*, 40mm* and 66mm* curtain eyelets as well as any other size of eyelet*, press stud*, pop fastener* or covered buttons*

Eyelets up to 40mm hole diameter are fitted using our single combination dies that do not require changing and resetting between the cutting and attaching process. This speeds up the whole fitting process dramatically.

Another feature is the option to have a back stop and side stop that helps to position the material correctly for each eyelet setting.

The machine can be fitted to any appropriate work surface that you may already have or as an alternative we have our own stable and sturdy bench specifically designed for the HP1000.

Main Features

- Heavy duty construction
- Sets eyelets up to **66mm** diameter
- Easy tool change for different eyelet size
- Phosphor bronze wear plate on ram to prevent wear
- Position of lever arm is adjustable for comfort.
- Soft rubber grip on lever arm.
- Supplied with full operating instructions
- Available with or without bench
- Can be fitted with a positioning guide to set the distance from the edge of the material and the distance between each eyelet.
