

# PMJ25 Pneumatic Eyelet Machine

This compact high performance machine takes the strain out of inserting all types of eyelet.

Totally air operated . Will in one single action punch out a hole in the material whilst simultaneously setting the eyelet or grommet.

- Does not require any electrical connection
- Extremely simple to operate.
  - Sets sizes up to 66mm hole diameter
  - Sets eyelets in a wide variety of materials including vinyl, plastic, canvas, cloth and leather
  - Side and Back stop for accurate placement of work.
  - An optional laser can be fitted as an alternative way of positioning material.
  - Foot operated pedal leaves both hands free.
  - Finger guard protection mechanism prevents operation when dies are obstructed.
  - Available with or without bench, or mounted on castors for moving around the floor/ table when working with very large pieces of material.
- We can even supply an appropriate compressor if required.
- A video demonstration of this machine can be viewed on our website.

Hook head version with large capacity throat

Mobile version for moving around the work area
